THE CLUB OBJECTIVES

The Australian Adam Smith Club (Melbourne) was formed in 1983, to promote and explore the further understanding of the principles and works of Adam Smith and like minded thinkers.

Members of the club take an uncompromising stand in the support of:

- * private property
- * freedom of contract
- * freedom from coercion by others
- * freedom of trade and enterprise in the market, both domestically and internationally
- * freedom of the individual within the framework of minimal government activity
- * freedom of movement of capital and labour throughout the world

Further, the Club has been formed to publicise the dangers to our civilisation of the consequences of the failure to promote the principles of freedom in the battle of ideas.

Membership is welcomed and is opened to any person who will support the objects of the Club as outlined above.
